Message from the Founder

Roman Yusifov
Founder "Global Activity Construction"

"

When I founded this company, I had a simple goal – not just to build structures, but to create confidence in the future.

We started small, but from day one I knew: success comes when you work honestly, keep your commitments, and treat every client like your first.

Today, Global Activity is a team of professionals, equipped with modern machinery, internal quality standards, and dozens of completed projects we are proud of.

We don't chase quantity – we build with integrity.

That's what sets us apart in the market. I am grateful to everyone who has entrusted us with their projects and confident that the best is yet to come.

"

About the Company

About the Company

Global Activity Construction was founded in 2008. Since its inception, the company has provided design and engineering services, and soon expanded its operations by offering independent technical supervision (inspection) and general contracting services.

With 15 years of experience in the construction industry, we have built a reputation as a responsive, innovative, and client-focused company.

Today, Global Activity is one of the largest engineering and construction companies in Azerbaijan. Our approach to work, our attitude toward employees, the implementation of advanced technologies, and other key factors have made Global Activity an attractive employer, even for specialists with international experience.

We currently cooperate with leading global organizations on a variety of projects, and our management system fully complies with international standards.

We possess extensive experience across various segments of the construction industry. In recent years, we have completed dozens of projects in residential and industrial construction, capital development, and infrastructure improvement.

These include the construction of internal roads, bridges, tunnels, and underground and overground crossings.

About the Company

15+ years

experience in the construction industry

Since 2008, we have been shaping the future through construction.

For over 15 years, our team has been involved in ambitious, complex, and high-impact projects across the country.
We combine experience with innovation to meet the evolving demands of the market.

50+

completed projects in Azerbaijan

Over 50 completed projects across Azerbaijan – and counting.

From Baku to remote regions, we've delivered high-quality construction solutions tailored to the needs of both public and private sectors.

95%

clients recommend us

95% of our clients recommend us – because we do more than just build.

We create long-term solutions, foster transparent relationships, and keep our word. That's why our clients return to us – again and again.

1000K+ м²

built real estate

1,000,000+ square meters of construction – from concept to completion.

Our projects serve thousands of people across residential, commercial, and industrial sectors.

98.8%

projects delivered on time

98.8% of our projects are delivered on time – without compromising quality.

We take deadlines seriously and plan every phase with precision. This level of consistency is the result of disciplined project management, strong internal coordination, and years of experience in the field.

Licenses and Certificates

Licenses and Certificates

We adhere to international standards at every stage of project execution. The listed certificates confirm that our work meets safety, quality, and environmental requirements.

Construction and installation license from the Ministry of Economy of the Republic of Azerbaijan

ISO 9001:2015 certificate from TUV-International

ISO 45001:2018 certificate from TUV-International

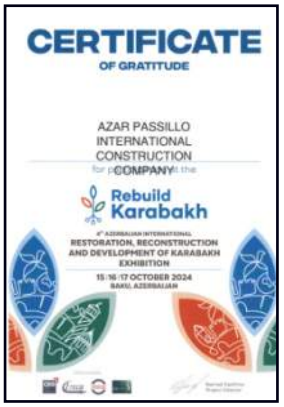

HSE-MS certificate from TUV-International

Certificate of compliance with management standards from TUV-International

Certificate No. 2024 1085

Certificate of participation in the international exhibition for the restoration of Karabakh

Official Representative Certificate in the Republic of Azerbaijan

List of Machinery and Equipment

List of Machinery and Equipment

Global Activity Construction operates a wide range of modern construction machinery and equipment, ensuring the efficient execution of construction, renovation, and infrastructure projects.

Our equipment handles projects of any complexity, and the fleet is constantly growing and evolving.

Name	Quantity
Dump truck	21
Modular camp units	18

Services

Services

We implement full-cycle residential and commercial projects – from concept and architectural design to commissioning – with guaranteed quality and timely delivery.

Road and Infrastructure Construction

A full cycle of road, bridge, tunnel, and infrastructure construction – from design and geodetic preparation to asphalt paving and road marking.

We operate in both urban and remote areas, ensuring durability, safety, and compliance with international standards.

Key services:

- Highways, access and internal roads
- Bridges and tunnels
- Drainage and engineering networks
- Transportation interchanges
- Landscaping of adjacent areas

Certified by ISO 45001:2018, we ensure strict quality control and occupational safety at every stage. With years of experience, we successfully execute projects of any scale and complexity.

Landscape Planning

A comprehensive approach to earthworks and landscaping that forms a stable foundation for future construction and utility systems.

We ensure precision through geodetic control, engineering calculations, and strict compliance with construction standards.

Key services:

- Excavation for residential and industrial buildings
- Grading, soil stabilization, and compaction
- Temporary and permanent access roads
- Landscaping with greenery, drainage, and small architectural forms

Our work minimizes future construction risks and ensures long-term site stability.

Services

Project Design and Engineering Solutions

Design serves as the strategic core of every project – ensuring technical reliability, architectural integrity, and cost-efficiency from the start.

Each project is structured from baseline analysis and technical brief to full documentation and coordination. Engineering systems – from power supply to automation – are developed in sync with architectural and structural solutions for maximum reliability and efficiency.

Key services:

- Technical specifications development and approval
- Design of engineering networks of any complexity
- Architectural and structural planning
- BIM modeling and digital project coordination
- Interaction with expert bodies and technical supervision

Private Home Construction

Tailor-made homes built with attention to individual needs – from architectural design to finishing and landscaping.

Our process includes detailed site analysis, consideration of landscape features, and close coordination with the client. We ensure transparency, adherence to timelines, and high construction quality.

Key services:

- Custom architectural design
- Construction using various materials (brick, aerated concrete, timber)
- Installation of utilities and engineering systems
- Interior and exterior finishing
- Landscaping and site improvement

We deliver homes that combine functionality, aesthetics, and energy efficiency – with consistent quality at every stage.

Earthworks

Comprehensive site preparation – from clearing and excavation to grading and compaction — even in challenging geological or spatial conditions.

Geological surveys help assess soil stability and minimize risks like settlement and flooding, ensuring safe and lasting foundations.

Key services:

- Site clearing and excavation
- Pits, trenches, and complex zones
- Backfilling, grading, and compaction
- Embankments, dam reinforcement, reservoir cleaning
- Soil removal and disposal
- Geological investigations and soil testing

Work is carried out using modern equipment and complies with ISO 45001:2018 standards for safety and quality.

Services

Commercial Construction

Functional business spaces built turnkey – with full compliance, technical precision, and operational efficiency.

We manage the full process: from surveys and design to construction, finishing, and commissioning – with strict regulatory compliance.

Key services:

- Office and administrative buildings
- Retail and hospitality venues
- Warehouses and industrial premises
- Exhibition stands
- Restaurants, cafés, bars
- Multifunctional spaces

All projects pass ISO-based quality control. We focus on speed, reliability, and efficient operations – because in business, precision matters.

Renovation and Redevelopment

Modernization of existing buildings – restoring, repurposing, and upgrading to meet con-temporary standards of comfort and performance.

Managed by our specialized unit **Global Activity Repair**, we deliver full-cycle solutions with tailored planning and technical precision.

Key services:

- Renovation of apartments, offices, restaurants, hotels
- Layout replanning and repurposing
- Utility system upgrades
- Structural reinforcement, facade and roof replacement
- Turnkey interior and exterior finishing

Our goal is to extend building life, improve value, and ensure functionality.

Steel Structure Fabrication

Full-cycle production of steel structures – from custom design and fabrication to delivery and on-site installation.

All components are manufactured at our own facility using modern equipment and treated with anti-corrosion protection. Compliance with technical standards and delivery timelines is ensured.

Key services:

- Custom steel structure design
- Fabrication of frames, trusses, beams, columns
- Poles, staircases, railings, and custom elements
- Anti-corrosion treatment
- Delivery and installation

A reliable solution for complex structural needs – fast, precise, and high-quality.

Projects

Astara Border Bridge — Client: AAY

Location

Astara, Azerbaijan

Status

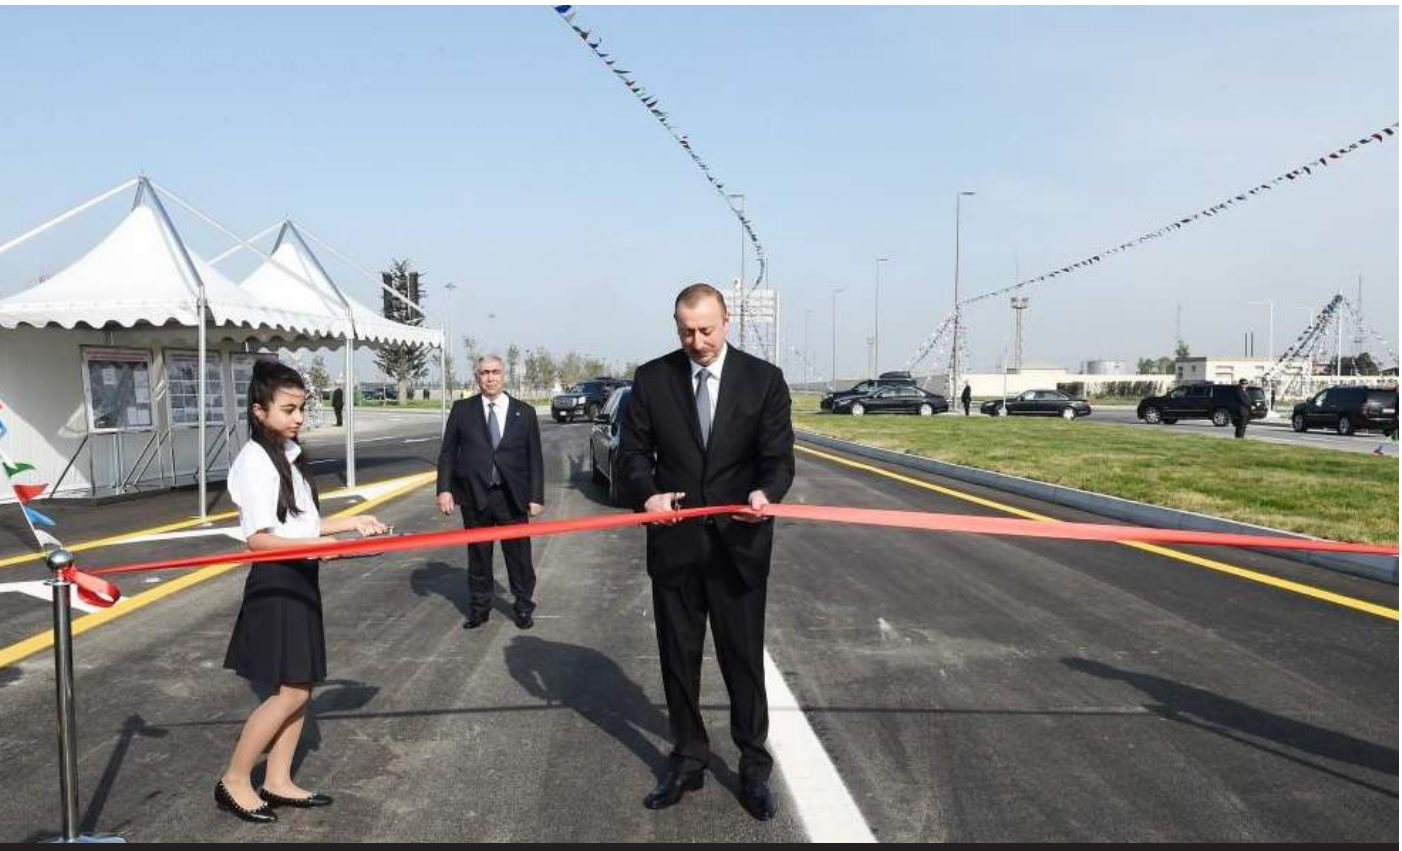

Completed in 2024

Type of work

Infrastructure and Bridge Construction

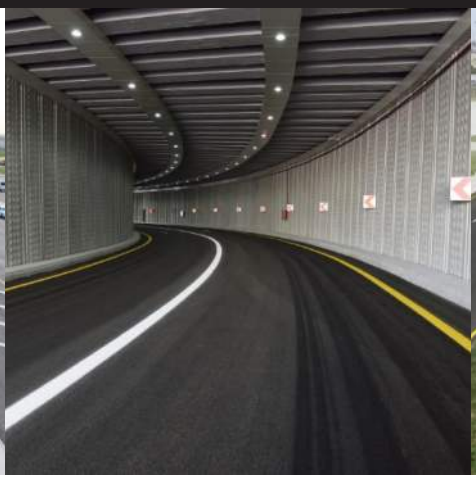

Scope

Design and construction of a cross-border transport bridge to improve logistics and connectivity at the southern border of Azerbaijan. The project included full-cycle construction works: foundation preparation, installation of load-bearing steel structures, road surfacing, and integration of utility systems. The bridge was delivered on schedule and in accordance with international engineering and safety standards.

Access Road – Baku Olympic Stadium — Client: AAY

Location

Astara, Azerbaijan

Status

Completed in 2023

Type of work

Road and Infrastructure Construction

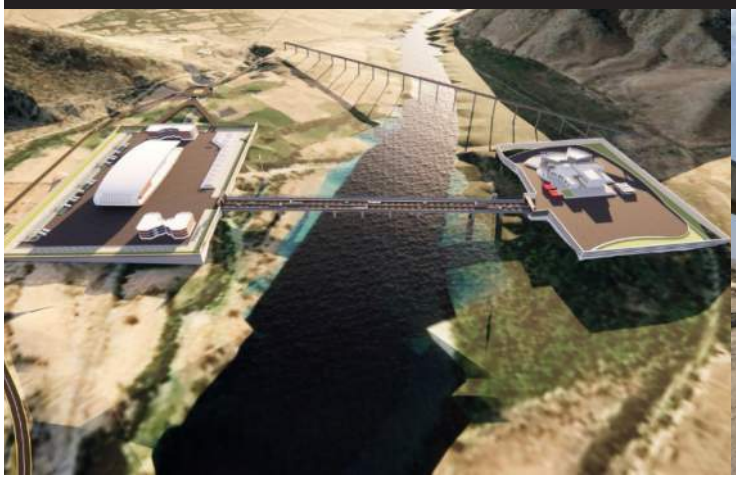

Scope

Construction of an access road and adjacent infrastructure to improve traffic flow and ensure safe, convenient access to Baku Olympic Stadium.

The project included earthworks, road surfacing, drainage installation, pedestrian zones, and lighting systems — executed in compliance with urban planning and safety standards.

Border Bridge – Kələlə–Ağbənd

Location

Eastern Zangilan District, Azerbaijan

Status

Under Construction (Planned Completion: 2026)

Type of work

Infrastructure and Bridge Construction

Scope

Strategic cross-border bridge currently under construction to enhance regional transport connectivity in the Eastern Zangezur Economic Region.

The project includes foundation works, installation of steel structures, road surfacing, and integration of utility systems — all in accordance with technical and safety standards.

Client: AAY

Road Restoration – Urea Plant

Client: SOCAR

Location

Alat, Azerbaijan

Status

Completed in 2024

Type of work

Road Restoration and Infrastructure Improvement

Scope

Restoration of the internal road network at the urea production plant in Alat Settlement to improve transportation efficiency and safety within the industrial area.

The project included milling of the old surface, base reinforcement, asphalt paving, and installation of road markings — executed to meet industrial facility standards.

Road Restoration – Oil Terminal — Client: SOCAR

Location

Sheki, Azerbaijan

Status

Completed in 2024

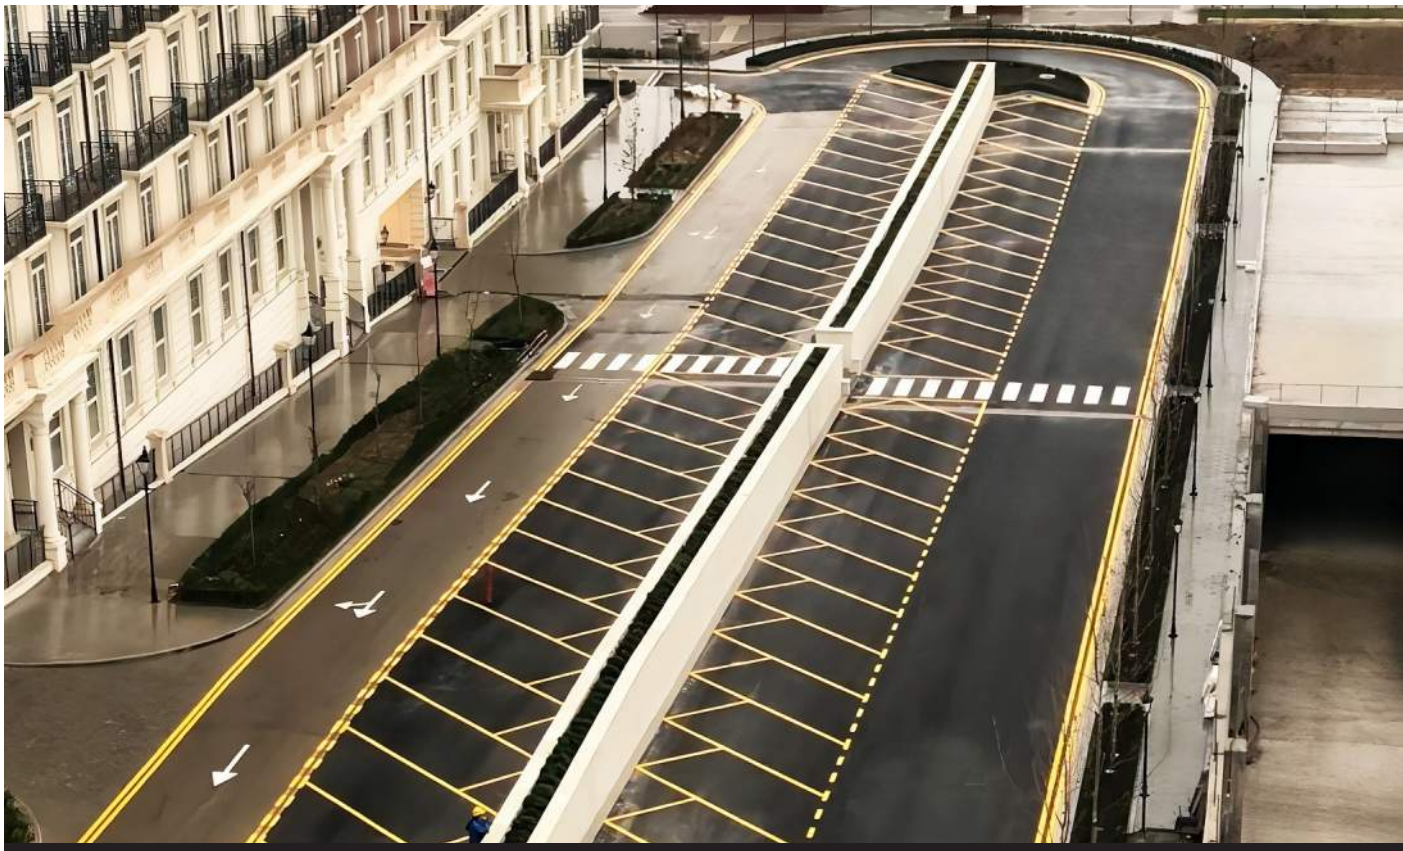

Type of work

Road Restoration and Infrastructure Improvement

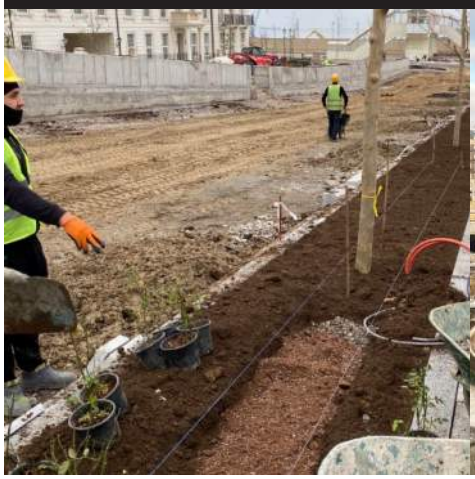

Scope

Restoration of the internal road network at the oil terminal in Sheki to enhance transportation efficiency and safety within the facility.

The project involved removal of the damaged surface, base reinforcement, asphalt paving, and application of road markings in compliance with industrial standards.

Road and Parking Area Construction – White City — Client: AAY

Location

Baku, Azerbaijan

Status

Completed in 2024

Type of work

Road Construction
and Urban Infrastructure

Scope

Construction of an access road and parking area in the White City district to improve traffic organization and provide convenient parking for residents and visitors.

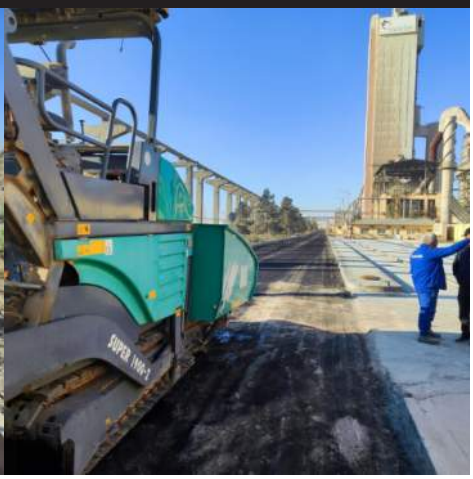

The project included earthworks, asphalt paving, installation of curbs, road markings, lighting systems, and landscaping in accordance with urban development standards.

Road Construction – Cement Plant — Client: HOLCIM

Location

Garadagh, Azerbaijan

Status

Completed in 2024

Type of work

Road Construction
and Industrial Infrastructure

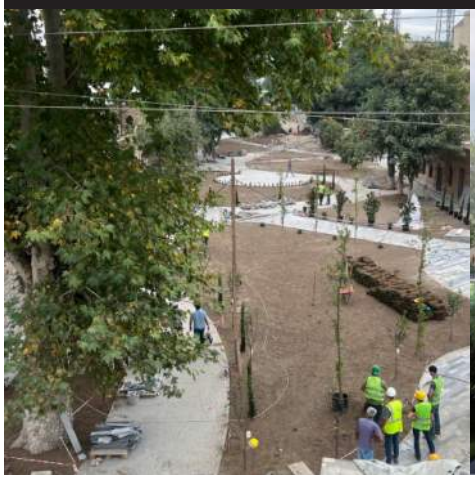

Scope

Construction of an internal road at the Holcim cement plant in Garadagh to improve logistics and ensure safe transportation within the industrial site.

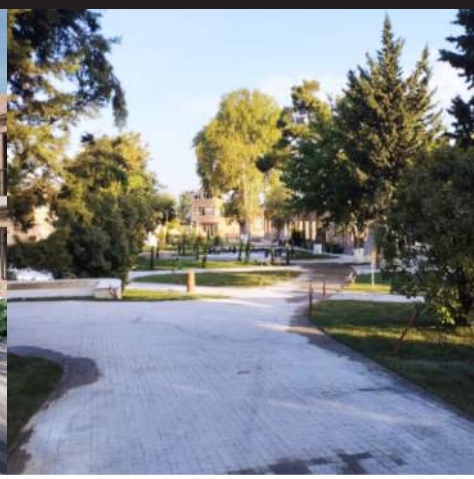

The project included earthworks, base preparation, asphalt paving, and installation of road markings — executed in compliance with industrial facility standards.

Landscape Works – ADA Gazakh Teachers' Seminary Park —— Client: ADA

Location

Gazakh, Azerbaijan

Status

Completed in 2024

Type of work

Landscaping
and Site Improvement

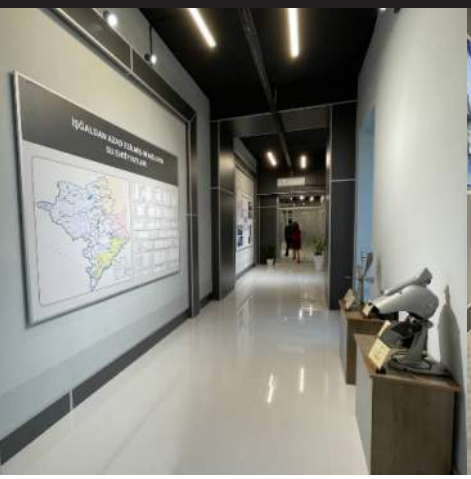

Scope

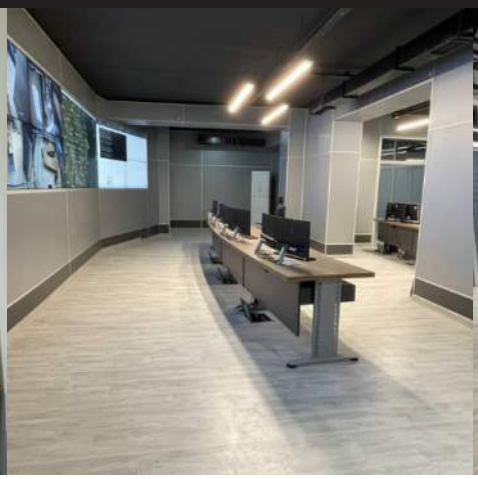

Landscaping of the park area at ADA Gazakh Teachers' Seminary to create a comfortable and aesthetic environment for students and visitors.

Works included site grading, installation of pedestrian paths, planting of greenery, lawn arrangement, and installation of small architectural forms in accordance with landscape design standards.

Interior Renovation —— Client: Ministry of Ecology and Natural Resources

Location

Baku, Azerbaijan

Status

Completed in 2024

Type of work

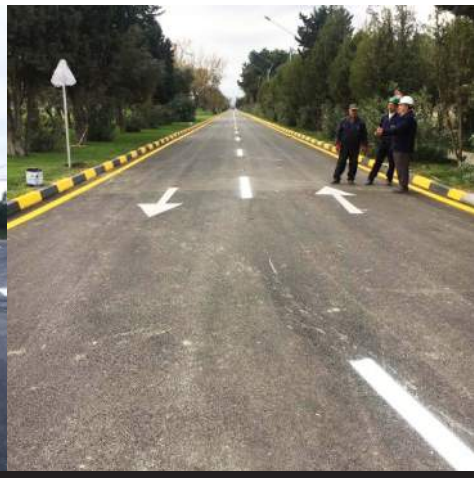

Interior Renovation

Scope

Renovation of office interiors at the Ministry of Ecology and Natural Resources, including dismantling works, replacement of engineering systems, wall and floor finishing, ceiling installation, and interior design improvements.

All works were carried out in line with modern standards for functionality, safety, and comfort.

Road Construction — Client: Baku Steel Company

Location

Sumgayit, Azerbaijan

Status

Completed in 2024

Type of work

Road Construction
and Industrial Infrastructure

Scope

Construction of an internal road network at the Baku Steel Company plant in Sumgayit to improve logistics and ensure safe transport within the industrial site.

Works included earthworks, base preparation, asphalt paving, and application of road markings in accordance with industrial facility standards.

Installation of Roadside Guardrails – Shusha — Client: AAY

Location

Shusha, Azerbaijan

Status

Completed in 2024

Type of work

Road Safety Infrastructure

Scope

Installation of 60 km of roadside guardrails along key road sections in Shusha to enhance traffic safety and reduce accident risks.

Works included delivery, assembly, and secure mounting of galvanized steel guardrails in accordance with road safety standards.

Renovation of Educational Facilities — Client: Ministry of Science and Education Republic of Azerbaijan

Location

Goychay, Azerbaijan

Status

Completed in 2025

Type of work

Interior and Exterior Renovation

Scope

Cosmetic renovation of over ten public schools in Goychay District, carried out as part of regional infrastructure improvement. Works included comprehensive replacement of flooring, painting and plastering, installation of new electrical wiring, and door replacement. Roofing systems were renewed, lighting upgraded, and stair railings replaced to ensure safety. All works were completed with attention to detail and in accordance with educational facility standards.

Renovation of Educational Facilities — Client: Ministry of Science and Education Republic of Azerbaijan

Location

Central Regions of Azerbaijan

Status

Completed in 2025

Type of work

Interior and Exterior Renovation

Scope

Large-scale renovation of public schools across the districts of Goychay, Aghsu, Gobustan, and Ujar, carried out to improve educational infrastructure and learning conditions. The project included comprehensive replacement of flooring, electrical wiring, doors, and roofing systems; painting and plastering works; modernization of lighting; and installation of new stair railings. Each school was renovated with attention to safety, functionality, and compliance with construction and educational standards.

Crafting enduring spaces with vision and precision

In Azerbaijan, our team transforms ideas into tangible results through expertise, dedication, and an unwavering focus on quality at every stage.

Global Activity Repair

GLOBAL ACTIVITY REPAIR

Masters of Refined Solutions in the World of Renovation and Style

Global Activity Repair is a team of dedicated professionals who see every space as an opportunity for transformation. We approach residential and commercial renovation with care, taste, and a deep respect for individuality – blending functionality with timeless aesthetics.

From delicate restoration to complete interior renewal, we create environments where people want to live, work, and dream.

Every project tells a story — through textures, materials, light, and clean lines. We are committed to deadlines, rely on proven technologies, and truly love what we do.

Location

Guba, Azerbaijan

Status

Completed in 2024

Type of work

3D Architectural and Interior Design

Scope

Development of a full 3D design concept for a private countryside villa in Guba, including both exterior architecture and interior solutions.

The project combined modern style with functional planning, visualizations for construction, and detailed design elements tailored to the client's preferences.

Location

Baku, Azerbaijan

Status

Completed in 2024

Type of work

Interior Design and Renovation

Scope

Comprehensive design and renovation of a modern-style apartment in Baku. The project included development of a unique design concept, functional space planning, and selection of finishing materials. Engineering systems such as electricity, plumbing, and ventilation were modernized to meet current standards. Works also covered wall and floor finishing, installation of ceilings, lighting, and custom furniture solutions.

Location

Baku, Azerbaijan

Status

Completed in 2025

Type of work

Interior Design and Renovation

Scope

Design and renovation of a modern office space, created in a minimalist style. The project involved development of a functional layout, optimization of working zones, and use of natural textures to achieve a calm and productive atmosphere.

Works included installation of engineering systems, wall and floor finishing, lighting solutions, and custom-made furniture. Special attention was given to ergonomics and comfort, ensuring the office meets both aesthetic and operational needs.

WORK

Partners

We believe that strong connections set the pace for progress. Our partners are not only companies from related industries but also ambitious players from a wide range of sectors.

From heavy industry to cutting-edge technologies, from logistics to creative solutions — together, we build an ecosystem where every participant contributes to our shared forward movement. At Global Activity, we value diversity and seek synergy through differences. This is what enables us to deliver large-scale and unconventional projects across the region.
